IMPERIAL SPEECHES.

The recent English papers present us with two royal documents-a speech from Her Majosty Queen Victoria on the opening of Parliament, and a similar address on a similar occasion from the Emperor of the French. The former, which was read by the Lord Chancellor, is as usual, the most common place of speeches. It roters with satis faction to the recent meetings of the French and English fleets and to the termination of the American war, rejoicing over the destruction of slavery in language more vigorous than is customary to be found in addresses from the Throne. "The abolition of slavery" it says " is an event calling forth the sym pathies and congratulations of this country, Estate of F. Pagden, late of Cariboo which has always been foremost in showing ANY PERSONS HAVING CLAIMS ON A the above Estate are desired to send in parti-culars of the same, within thirty days from this date, to the Bank of British Columbia, Victoria, or the same will not be allowed. Victoria, 23d March, 1863. m24 its abhorrence of an institution repugnant to every feeling of justice and humanity." The diminution of the slave trade on the West coast of Africa is also alladed to in terms of congratulation. The renewal of diplomatic relations with Brazil through the mediation of the King of Portugal and the concluding of treaties of commerce with Austria and with Japan, are events highly spoken of. The Fenian movement, the Jamaica insurrection, and even the reform bill are passed over very quietly. An unusual interest was evinced in the opening o Parliament, in consequence of Her Mojesty having announced her intention, after severa years of seclusion, of being present. The event has created quite a lively feeling of satisfaction throughout the metropolis; for it was doubted until the last minute whethe Her Majesty would really attend. The publie mind had been so frequently disappointed over the Queen's re-entering public life that it had almost given up the hope of royalty again assuming its social and politica responsibilities. However the ice has now

been broken; and tailors, milliners, clothiers. parfumeurs, and head-dressers are in costacies.

The speech of Louis Napoleon, although devoid of anything that savors of myster; or mischief, is nevertheless an interesting doc ument. The Emperor was accompanied by the Empress, the Prince Imperial, Prince Napoleon, and other members of the royal Another arrival, ex 'Del Norte,' family. Exalted personages must be rathe wanting in ordinary gifts or acquirements for we find great stress laid upon the fact tha His Imperial Majesty read his speech in clear and impressive manner. The first par of the speech relates to England France. The re-union of the fleets in the same ports, the Emperor says, "show that the relations formed on fields of battle have not been weakened-that time has only cemented the good understanding of the two countries." The Mexican question is o course the principal foreign topic in the speech. "In Mexico," says the Emperor, "the Government founded by the will of the people is becoming consolidated. The mal-contents, vanquished and dispersed, have no longer any chief. The national troops have shown valor, and the country has found guar antees of order and security which have developed its resources and raised its commerce with France alone from 21 millions to 77 millions. Thus, as I expressed last year the hope, our expedition approaches to its termination. I am arranging with the Emperor Maximilian to fix the time for the recall of our troops, in order that their return may be effected without compromising the French interests which we want to defend in that distant country. The uneasiness produced in the United States by the presence of our army on Mexican soil will be appeased by the frankness of our declarations. The American people will comprehend that our expe dition, in which we invited them to take a part, was not opposed to their interests Two nations equally jealous of their independence ought to avoid any step which would implicate their dignity and their bonor." The Emperor bestows a panegyric ou his wife's rule while he was absent in Algeria, and alludes to the general and growing progress of the country. The municipal institutions come in for a large share of his praise. "The Maire" he says, "being in the commune the representative of the central power, the Constitution has conferred upon me the right of selecting those officers from all the citizens; but the election of intelligent and devoted men has enabled me in nearly all cases to choose the Maire from among the members of the municipal councils." We are told that the public receipts are increasing while the expenditure i diminishing, and the advocates of retrenchment are assured that a reduction is being made in the army. Education is not neglected. Thirteen thousand new classes for adults have been opened in the sommunes of the empire. It is on French political theories, however, the Emperor finds himself most at home. The closing part of his speech, which reaches a kind of Napoleonic eloquence is too good to be summarised; we therefore give it in its entirety Speaking of the French Constitution the Emperor says: "It keeps at an equal distance from two extreme situations. With one Chamber holding within itself the fate of Ministers, the Executive is without authority

and without spirit. Again, it is without

control if the elective Chamber is not inde-

pendent and in possession of legitimate pre-

rogatives. Our constitutional forms, which

have a certain analogy with those of the

United States, are not defective simply be-

cause they differ from those of England

Each people should have institutions which

are conformable to its genius and to its tra-

ditions. It is true that every Government has

its defects; but, in glancing over the past. I

am rejoiced, at the end of fourteen years, to

find France respected abroad and tranquil at

home, without political captives in her

prisons, without exiles beyond her frontiers. paper office, or at the Booksellers.

An influential meeting was held in Dublin on the 1st inst. The Marquis of Downshire presided. A resolution was adopted declaring that the Fenian conspiracy had produced a feeling of well-founded alarm, and it was the duly of the Government to use the most effective measures to crush it, and to afford full protection to the loyal and well disposed. Another resolution calls on the disposed. Another resolution calls on the Government to increase the military force in Ireland. Both resolutions were passed

All its funds in Europe are exhausted, and the stringency of the money market renders it impossible to float a fresh loan of borrow money from the concessionaires of the projected Imperial Bank of Mexico. The expenditure of the Mexican empire for 1865 has been upwards of £9,000,000, and its total revenue about £4,500,000 string. The deficit for 1865 is thus £4,500,000; in 1864 it was £6,000,000. FEARFUL SHIPWRECK.

FEARFUL SHIPWRECK.

LOSS OF AN ENGLISH STEAMER WITH TWO HUNDRED AND FIFTY LIVES.

A correspondent writing from London says : "We have had most fearful weather the last week, and the number of ship wrecks has been unprecedented. Conspicuous amongst others has been the loss of the splendid screw steamer London belonging to Messrs Wigram here. This vessel was bound from London to Mel bourne, with 270 passengers, and a cargo roughly estimated at £300,000. In geting in to the Bay of Biscay she encoun-ered fearful weather, and one tremen lous sea washed the coverings to the bunkers and engine room off, and in a minute the engineers found themselves The Franch Senate, in reply to the Emperor's speech, expresses satisfaction that the mission of the French troops in Mexico approaches completion, and that the "firm communication" from the Emperor to the United States has shown that "menacing language will not cause France to withdraw."

The Spanish Minister in London has telegraphed to the Spanish Governor of Cadiz that two vessels, under Peravian flags, had left England for privateering purposes, and that two more vessels were being fitted out with a similar object. A letter from Admiral Passia written shouth before his death is men and three passengers, hod got clear sf the wreck, she went down with every soul on board. The passengers were nearly all wealthy people returning home after a visit to the old country. I have not had time to go over the list of those lost but I notice Mr. De Pass, of the firm of De Pass & Sons is amount them.

One lady offered a thousand guineas to be taken into the boat but veryone knew their fate, and might, not right, was the order of the day." The Amelia, another splendid steamer belonging to Messrs. Papayanni of Liverpool, with a cargo valued at two hundred thousand pounds, foundered in precisely the same way and in the same gale, but fortunately all hands were saved. Great fears are entertained for the safety of the Royal Mail steamer Atrato, with the homeward West India and Pacific mails. HOLLOWAY'S OINTMENT AND PILLS, a certain remedy for diseases of the skim—Ringworm, scurvy, scrofula, or king's evil, sore heads, and the most inveterate skin diseases to which the human race is subject, cannot be treated with a more safe and speedy remedy than Holloway's Ointment and Pills, which act so peculiarly on the constitution, and so purify the blood that the constitution, and so purify the blood that the constitution, and so purify the system, and a laating cure is obtained. They are equally efficacious in the cure of tumours, burns, scalds, glandular swellings, ulcrous wounds, rheumatism, contracted and stiffjoints. Those medicines operate mildly and surely. The cure effected by them is not temporary or apparent only, but complete and permanent.

Whateverthe condition of the patient, Holloway's medicines will rectore, if recovery be possible; they will retard the alarming symptoms till the blood is purified and Nature consumates the cure, gradually restoring strength and vital nervous power. By persevering in the use of Holloway's preparations, tone is conferred on the stomach and frame generally; the fluids are regenerated, morbife matter is expelled, and a

egenerated, morbific matter is expelled, and appy revolution occurs throughout the system.

Hollowar's Oitment and Pills—Palpitation, shortness of Breath, Dropsy.—This last named disease is often preceded by irregular action of the heart, and difficult respiration which symptoms are always severe, and ever go from bad to worse, unless proper means of cure be resorted to. In Holloway's unrivalled Ointment and Pills' the dropsical patient will ever find succour; the present relief derived from the use of these remedies is marvellously quick, and persecuance in the steady application of this noble Ointment invariably results in a lasting and satisfactory cure. The two medicines act with such energy on the circulation and absorbent system, that the dropsical fluid vanishes, and the sufferer finds all the oppressive symptoms daily decline, till natural health returns.

Holloway' Ointment and Pills.—Fistu las, Piles, Exceriations, and Strictures, are speedly relieved and ultimately removed by applying this Ointment after fomentation with warm water. Persons suffering from these scourges of the human frame should arrest their progress at once, for it is both insidous and rapid. Fistulas, if long allowed to go on unchecked, not only weaken the nervous system, but destroy life. The sooner these inestimable remedies are used the more certain is success; yet none should despair, hopeless cases have often yielded, and the sufferer has been saved a painful death. In excertations, a few applications of this healing Ointment effect a cure, while the Pills, conjointly used, are capically beneficial in relaxing and removing strictures, whatever their situation or duration.

HotLoway's Pills —Their long tried efficacy in removing indigestion, atimulating the bowels, and purifying the blood, have secured them imperishable praise throughout the globe. Whatever the disease, a few doses will relieve the more urgent symptoms and thereafter completely control all disordered action, rouse the torpid liver, empty the engaged spleen, clause the obstructed kidneys, assimilate the food, improve the blood, and thereby confer on the brain and every function healthful vicour natural activity, and wholesome regularity. In cases of indigestion, dimness of sight, headache, mental and physical lassitude, these restorative Pills act as a charm. They expel rheumatism and gout, while they infallibly correct female complaints in young and old, delicate and robust.

HOLLOWAY'S PILLS AND OINTMENT—Stomach and Kidneys. Between these two organs there exists a close and intimate relation which is demonstrated by the wasting which occurs in all diseases afflicting the kidneys. The disordered stomach is often the first index of renal irrequirity. Holloway's remedies used at that juncture would cut short many a serious and fattal attack. They not with wonderful efficacy on every organ of secretion, but especially do they regulate the stomach, liver and kidneys, in restoring their healthy functions, and casting out any obstructions or impurities. It is necessary for the ointment to be well rubbed into the small of the back twice daily, when it is absorbed and greatly augments the purifying and salutary influence of the Pills. In all severe pains in the joints and muscles, after due fomentation with hot water, the soothing action of this Ointment is most remarkable; it seems at once to lessen inflammation, case pain, reduce the swelling, restore the frecirculation, and expel the disease. In these complaints, indeed, Holloway's Ointment and Pills are an infallible specific. The Ointment should be rubbed as near the part in pain as the paticate can bear; it is absorbed and directly conveyed to the diseased textures, when, acting on nerves, vessels, and guiders, it will arrest disease and again establish healthy action.
